

DXC-C33/C33P

3CCD Color Video Camera

Ideal for use in space-limited locations, the DXC-C33/C33P incorporates one of the smallest/lightest camera head units featuring a 1/3 type 3CCD. In spite of its compact and lightweight camera head unit, this model inherits the superb picture quality of the DXC Series. The DXC-C33 boasts a horizontal resolution of 850 TV lines and minimum illumination of 2000 lux at F8. Various features such as DynaLatitude™ and Partial Enhance are incorporated in this model.

A first for the DXC Series and for 3CCD small head cameras, the DXC-C33/C33P is equipped with a DV output terminal. Thanks to the DV output terminal, video signals can be recorded directly to i.LINK™ interface-equipped VTR with no quality deterioration.

With excellent features and UL-2601 medical approval, the DXC-C33/C33P is the right choice for medical, research and industrial microscopy applications.
